Attn: Today's youth

Reference: A Desire for a Better Life

Welcome of the Father,

It is quite encouraging to see the youth of today vocally and Peacefully express their Desire for a Different Future. You are indeed Loved and supported by Creation in this.

I write to you from the view point of an adult who is really unsure how to address your generation and reach it. How should I word that which I wish to share? How much can I say before your attention moves on to more pressing things? So I ask you bare with me with patience and understanding. There is so much I would like to say to support your innocent Desire in a good and healthy way..

Past generations have certainly goofed up. Intoxicated by the false glitter of civilization, science, order, government, war, plunder, progress / technology, profit, comfort, and yes, sex, dope, and rock & roll as well. There is no doubt about that. The stench and radioactivity of our bodies, air, water, and food certainly attest to this.

Be aware though that these past generations were once the youth of their time. Born of conquered parents. Schooled to be ashamed of their ancestor's roots and "primitive and simple ways." Glamorized by the brilliance of the scientific discoveries and technological gadgets of their times. Scorning and ridiculing their elders who asked them to follow a natural way of life that harmonized with Creation rather than one which worked against it. "What did those old antiquated farts know anyway?"

Be aware as well that there are many groups around the world who have wisely chosen to not participate in the destructive path and false promises of "progress" and "civilization." Such groups include for example the Amish, many indigenous tribes who remain true to their "primitive" ways, the much hated gypsies, many intentional communities, and oddly enough even many homeless people who owe their homelessness to their refusal to be a part of the "system." Each to the best of their ability to withstand the onslaught of "civilization" as it seeks to engulf every single living being in its insanity and to destroy any vestiges of self sufficiency freely received directly from Nature.

I realize it seems to you that your generation needs to go through the "proper" channels of the world and society to solve this problem and to bring change, however that is truly unnecessary.

The "system" you seek to "change" or "work" through knows how to pretend to care. It knows how to deliver empty promises to appease angry souls. It knows how to lock humanity in endless debates while it continues to pilfer and destroy. It has spent untold wealth to manipulate, seduce, and entice the youth of each generation to further the goals of darkness or death, decay, and destruction. It has sacrificed millions, if not billions, of humans in search of total dominion and control over mankind. It is masterfully crafty at dividing humans against each other even to the point of justifying death. It knows how to start wars or usher in environmental and financial catastrophes to keep humanity in fear and thus trapped in the deception, incapable of acting upon its Desire for Life.

Think of the genocidal campaigns against the natives. Think of the youth of Nazi Germany... their innocent desire for a better world skillfully manipulated to fervently support and enforce tyranny, suppression, and much violence. Think of Albert Einstein who, in his desire to "save the world," made it possible for the Earth to be turned into a nuclear wasteland. Think of all the scientists of the world who are following in his footsteps repeating his mistakes. Think of all the "missionaries" who go far and wide to spread madness to every corner of the Earth. Think of all the millions upon millions of young people who join the armies of the world in the belief that human sacrifice is the answer to humanity's problems.

Please take note. We must do things Differently if we are to see Different results. As Einstein learned from personal experience: "we can't solve the problem with the same mind that created it." We must look beyond the very "system" and mindset it carefully crafted to ensure it's self replication and the pilfering of the Earth and her People. Improving conditions within the prisons it creates is not enough.

Your generation need not repeat the same mistakes others have made. It doesn't have to wait for "adults" to wake up and change things around. It doesn't have to engage in human sacrifice. Neither does it have to "vote" for "change" or fall prey to "death by contact." Your generation (and for that matter anyone who so wishes) can begin anew and afresh right here and now. Not a single law needs passed nor another human sacrificed for us to usher in a Bright New Future for Humankind.

Rather than "fight" against the "system," whistle a happy tune as you walk around it.

The political "system" as we know it was never designed to bring people together for the common good of Humanity and Earth. Quite on the contrary.

"The Reader's Digest Great Encyclopedic Dictionary" printed in 1971 explains that "politics" is:

- ◆ the affairs or activities of those who are engaged in controlling or seeking to control
- ◆ the act or practices of those who seek any position of power, authority, or advantage

This dictionary also defines “politician” as:

- ◆ those who engage in politics for personal or partisan aims
- ◆ a political opportunist

The “system” is doing exactly what it was designed to do: make it possible for madmen to profit from raping People and Earth. History and current affairs show the veracity of this statement.

To believe that one can “change” the system for the better is as mistaken as to believe one can change someone else. Every human who has entered marriage thinking that they could change their spouse for the better knows the veracity of this.

There is no need to repeat past mistakes only to end up corrupted or devoured by the “system.” Please allow me to share with your generation some ideas of how this can be. They are the result of much Soul searching born out of a great Love for Creation and a Desire for a Different Way of Life that supports Humanity's Health and Well Being at no one's expense. For this, I kindly refer you to three files.

The first two are videos which can be viewed at www.bluestarway.com/increase4all . Simply scroll down the page until you see them.

The first video is titled "The Squatting Conundrum." Through it I share a key recognition that is essential to turning things around. I also explain why “sustainable” and “renewable” “solutions” aren't anywhere close to enough to solve the problems we are facing. After all, all wars (except genocide) are fought in “sustainable” and “renewable” ways, always leaving behind enough people to grow food, clean the toilets of the warmongering bastards, and produce more cannon fodder for the next great war which is sure to end all problems “once and for all.”

The second video is titled "Sensory Deprivation." Through it I explain how everyday sensory deprivation is used to control and manipulate people (this especially includes your generation.) I also explain what can be done about it.

The third file I would like to share with your generation is in the form of an e-book. What are some of the things we need to know and do to break the pattern of self destruction that has been annihilating all Life on Earth? What do we need to know to create a Different Future? Please take the time to find out by visiting www.bluestarway.com/parenting/ . Your children will thank you for this.

Yes, we are in deep “doo-doo,” however simple but powerful solutions can be easily implemented on an individual level where it really matters and where the real change needs to take place. There is indeed much Hope for a Bright New Day and Way of Life.

This great change could be immensely facilitated by your generation's ability to break free from the “spell” of false promises and the glitter of a life and technology that have turned our bodies and Earth into a toxic dump.

You have the strength of your youth in your favor. Use it wisely.

Please generously share this letter in its unaltered original form. It is my simple contribution to a Bright New Day.

May the Father Walk with you,

Martin
